

Value Opportunity and Identification

A Global Chemicals Manufacturer Deployed a initial Lean Program and later integrated Six Sigma and SCOR Based Supply Chain Assessment.

•Market :

Rubber Chemicals

•Client :

Turnover : \$500MM

Customers : global, regional

Employees : 1,500

CLIENT ISSUE

The global manufacturer was facing widespread quality issues driving costs up and capacity down. They were facing strong customer pressure to improve first time quality, reduce costs, and implement Six Sigma. They were also facing strong competitive pressures on pricing, quality, and supply assurance. There was also a need to remove quality barriers to production in a lean manufacturing environment. As part of a corporate deployment of Six Sigma, they sought program support, six sigma training and application (Black Belt, Champion, Manager) from seasoned professionals. Significant issues through the supply chain also needed to be identified and resolved. This needed to be completed in an environment where other existing problem solving methodologies were in use, requiring added coordination and integration.

SOLUTION / APPROACH

- Developed Corporate-wide/World-wide implementation program
- Trained Leadership teams and management teams from each business unit in the Six Sigma/Lean methodologies, basics of the tools, and roles and behaviors to support implementation
- Trained and coached Six Sigma Black Belts, Green Belts, Lean Experts, and in process of training Supply Chain Experts (SCOR). SCOR assessment completed and scorecards are developed and project portfolio has been prepared
- Provided focused on-site project support in critical problem areas to accelerate results
- Developed and integrated client-specific case studies into the training modules

CLIENT BENEFITS

- Average savings from BB and GB projects over \$700,000
- Over 50 Black Belt and Green Belts trained/certified
- Over 50 executives/business leaders trained in Executive Green Belt workshops and teamwork sessions worldwide
- Over 50 managers/project sponsors trained worldwide
- Worldwide program support delivered with opportunity to continue to deliver in multiple languages
- Preparing Management Board Green Belt training for CEO and staff

OUR DIFFERENTIATORS

- Proven process, tools & methodologies
- Consistent curriculum & delivery
- Executive Leadership coaching
- Experience in Six Sigma deployment integrated with a lean program
